

Memo

To Charlotte Campus Students

From Amber Perrell, Ed.D.
Dean of Students

Date January 25, 2021

Re **Point of Origin Testing Requirements before February 1**

All students returning to campus for in-person instruction or any other on-campus activity (work, internships, etc.) must complete a point of origin COVID-19 test. The point of origin test must be a PCR test (not an antigen test) taken 72 hours prior to your arrival to campus.

Point of Origin Testing Protocol

- Negative PCR test results should be emailed to clt.covidtestresults@jwu.edu and positive results to hcs.clt@jwu.edu. The submission confirmation email or Health Services clearance will be necessary to receive your clearance wristband. For testing locations, please review the [Centers For Disease Control and Prevention testing site](#) or, for those in Mecklenburg County, see the [Mecklenburg County test site](#).
- When submitting your test results, please be sure to provide the following:
 - o A screenshot/picture of your test result that also shows the test date, the type of test (it must be a PCR test, not an antigen test) and the result.
 - o Your email should include your name and J#.
- Students who were tested for COVID January 11-15 and submitted their results are eligible to be re-tested on campus. The details about the re-test process provided by JWU Charlotte was shared on Friday, January 22. Re-testing will only take place on January 29-30 and you must sign up, so please see the email from Health Services for details.

Residential Students

- Residential students who have already moved onto campus for emergency housing should keep your clearance wristband until the February 1 start. If you have not gotten your clearance wristband, please do so immediately or you should be in quarantine. Be sure to follow the stay-at-home directives previously shared.
- If you are remaining home/off campus until the February 1 start, you should plan to arrive January 29-31. See above for arrival details based on your COVID point of origin test status.

Commuter Students

- Commuter students should refer to the above section if you have already taken your point of origin COVID PCR test January 11-15; otherwise, students should have a PCR COVID test 72 hours prior to your arrival (January 26).
- Commuter students can check-in prior to the February 1 start to receive your clearance wristband. To receive your wristband, you must have submitted your negative PCR test result and be able to show your submission confirmation email along with your daily COVID screening. Below are the commuter check-in times:
 - o January 29 @ 9 – 11 a.m. and 2 – 4 p.m. (Wildcat Center)
 - o January 30 @ 1 – 3 p.m. (Wildcat Center)
 - o January 31 @ 1 – 3 p.m. (Wildcat Center)
- Failure to check-in prior to classes beginning may delay your ability to resume in-person instruction.

Any additional questions related to point of origin testing requirements can be directed to [Dean Perrell](#).
